Resource Navigation
Hey!

My name is Gene, and I'm here to listen to any frustration that you have relating to Huntington's disease and I'll attempt to push you toward the most appropriate resource.

I am still in my training phase, but the more that people use me the better I am able to recommend options for your specific frustration.

So briefly express a Huntington's disease related frustration with me.

Part of me right now wants to get tested and get it over and done with, but another part of me is absolutely terrified.
Thank You
Casey Herrington, Project Director HD GEM
